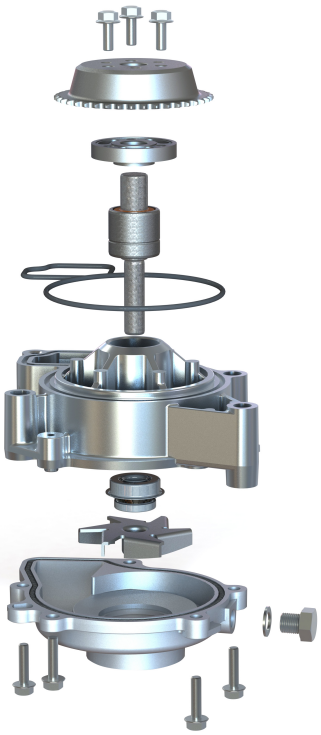
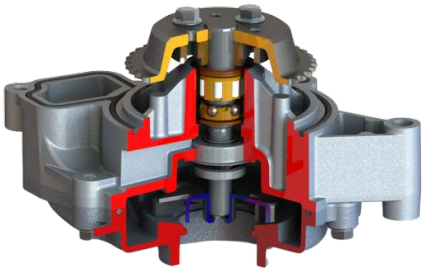
TIMING CHAIN WATER PUMP KITS

Complete repair solution for higher mileage engines





For General Motors 2.0, 2.2, and 2.4-liter Ecotec applications, Cloyes has developed timing chain water pump kits. Timing chain-driven water pumps should always be replaced at the same time as the timing chain to reduce warranties, customer comebacks, and preserve long-term system performance. With water pumps failing more frequently than timing chains, we're now giving our customers the opportunity to replace these components concurrently, which can reduce comebacks and additional labor fees for the consumer.

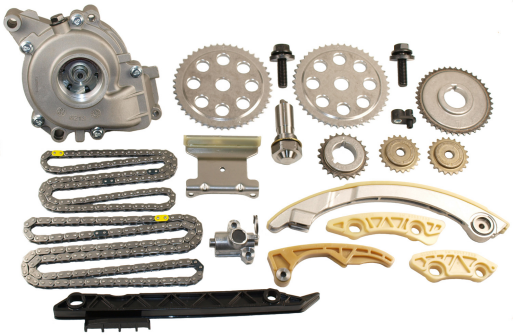
WATER PUMP KIT SPECIFICATIONS:

KITS FOR GM ECOTEC ENGINES

Part Number Model/Year Information:

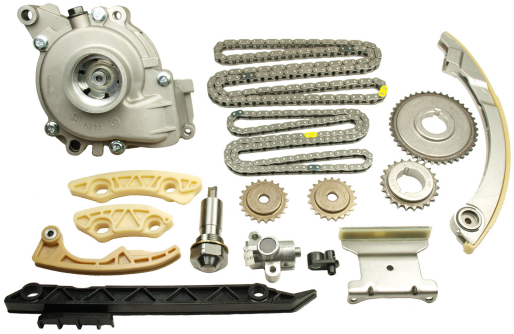
9-4201SWP
2000-08 GM 2.0L / 2.2L / 2.4L

Alero, Cavalier, Classic, Cobalt, G5, Grand Am, HHR, Ion, L100, L200, L300, LS, LS1, LW1, LW200, Malibu, Pursuit, Sunfire, Vue



9-4201SAWP
2006-17 GM 2.0L / 2.2L / 2.4L

Allure, Aura, Captiva Sport, Cobalt, Equinox, G5, G6, HHR, Impala, Ion, LaCrosse, Malibu, Orlando, Pursuit, Regal, Sky, Solstice, Terrain, Verano, Vue



- Providing technicians and consumers a complete system solution
- Water pumps 100% pneumatic leakage tested
- Tested in a full operational RPM range with eight different test parameters, including torque, flow, outlet pressure, temperature, inlet pressure, axis power, efficiency, and lift
- Conducted real world installations on multiple test vehicles, including average mile-per-year driven SUVs and spiritedly-driven sports cars, all kits performing without issue
- Timing chain water pump kits are necessary as the shift to OE chain-driven timing drives increases

ABOUT CLOYES:

Cloyes, based in Fort Smith, Ark., is the North American leader and a global designer, developer, manufacturer, and distributor of timing drive systems and components for the automotive aftermarket. Its products are mission critical components for engine performance and function and are used in high-performance and replacement applications.
