

Remote Entry Transmitters

OE

General Motors Original Equipment transmitters from GM Genuine Parts are the true OE parts installed during production or validated by General Motors for GM vehicles. Our transmitters are designed, engineered, tested to rigorous standards and backed by General Motors. (Some GM Genuine part transmitters formerly appeared as ACDelco GM OE)

FEATURES

- 5 button: lock, unlock, panic, trunk, and remote start
- Brand new OE replacement; the GM recommended replacement for your original keyless entry remote
- Battery included with the remote
- Transmitters require programming. Technicians can access GM service information (SI) or aftermarket service information sources for programming instructions
- Only transmitters programmed to the vehicle will work.
- If a transmitter is lost or stolen, a replacement can be purchased and programmed through the dealer. The vehicle can be reprogrammed so that lost or stolen transmitters no longer work
- Most GM vehicles can have up to eight transmitters matched to it

OPERATING RANGE-REMOTE KEYLESS ENTRY

- The keyless access system allows for vehicle entry when the transmitter is within 1 m (3 ft.)
- Transmitter functions may work up to 60 m (197 ft.) away from the vehicle
- If there is a decrease in the RKE operating range:
 - ✓ Check the distance. Transmitter may be too far from the vehicle
 - ✓ Check the location. Other vehicles or objects may be blocking the signal
 - ✓ Check transmitter battery

Refer to the electronic parts catalog or ACDelco's electronic catalog at www.acdelco.com for the most up-to-date applications and a complete list parts.
